

Project Samples

1. Blood Friends: <https://bloodfriends.org.in/>
"Blood Friends" is an initiative, primarily operating as a mobile application in India, designed to connect voluntary blood donors with individuals in urgent need of blood. The app acts as a centralized database where recipients, blood banks, and hospitals can locate nearby donors.
2. Friends2Support: <https://www.friends2support.org/>
Friends2Support.org is a prominent non-profit, volunteer-driven platform designed to connect blood donors with individuals in need across several countries, including India, Bangladesh, Nepal, Malaysia, and Yemen. It serves as a 24/7 database to eliminate blood shortages in emergencies.
3. Simply Blood: <https://play.google.com/store/apps/details?id=com.posl.bloodfriends&hl=en>
is the world's first virtual blood donation platform, founded to connect blood donors directly with those in need. It operates via a real-time Android app and website, allowing users to find donors within a 5km radius without charging fees.
4. Donator – Blood Donation App:
<https://play.google.com/store/apps/details?id=mss.app.donator&hl=en> is a mobile platform that connects blood donors and recipients in real time, focusing on quick, location-based matching to save lives. Users can request blood, find nearby donors, chat directly, and manage donation history.
5. New Zealand Blood Service: <https://www.nzblood.co.nz/knowledge-hub/nzbs-donor-app>
designed for Kiwi blood and plasma donors to manage appointments, track donation history, and receive eligibility alerts. It allows users to book, reschedule, or cancel, features a digital donor card, and includes gamified "milestone badges".
6. Blood bank management system:
